

For more than 26 years, Eastern Oregon Net, Inc., and PriorityOne Telecommunications, Inc. (EONI) has served our local communities in eastern Oregon with a singular focus – *Internet Done Right*. This will continue to be the goal moving forward, and you'll have a larger dedicated team behind this purpose.

Today, we are excited to share that we've reached an agreement for Ziplly Fiber to acquire EONI, including our fiber internet, fixed wireless and voice solutions for residential and commercial customers in Baker, Union and Wallowa counties. Together, the combined EONI and Ziplly Fiber team will provide our customers and communities will continue to provide *Internet Done Right*.

Ziplly Fiber is a Northwest company with a mission to simplify and elevate the connected lives of the people in the communities where we live and work. In two short years, Ziplly Fiber has begun new fiber construction projects in more than 80 towns across the Northwest, as part of a \$500 million commitment to build an advanced, 100-percent fiber network to both suburban and rural communities across the region.

As an EONI customer, you won't experience any immediate change to your internet and voice services. Once the acquisition officially closes in a few months, the Ziplly Fiber and EONI network architecture will be merged to deliver greater redundancy and reliability and also the fastest residential fiber internet in the Northwest, through Ziplly Fiber's 2-gig and 5-gig service tiers.

Your friends and neighbors who work for EONI will continue to do so as part of Ziplly Fiber. We look forward to providing you best-in-class internet and voice services and are excited about how future network advancements will support the broader community.

If you have any questions, you are welcome to contact EONI customer care at 541-962-7873, reply to this email or see eoni.com/ziplly
